Recommended action

We uphold both our LT fundamental recommendation and ST relative rating for the Company at Buy and Overweight, respectively. Our 12M EFV adjusted for the dividend (the ex-dividend day at August 26, the dividend payment at Sept. 11) stands at PLN 50.4 per share.

The impact of the COVID-19 pandemic on the Company's financial performance is significant. For some time the only treatments to be carried out on an ongoing basis were the urgent ones. Currently the patients seem to remain wary and cautious about testing. As we mentioned before, 2Q net loss that followed yoy weaker 1Q20 results has not caught us unawares. When the pandemic is finally under control, we expect a deferred demand for medical procedures offered by the Company (CT and MRI scans) to surface. We may not witness extraordinary improvement in 2H20 though the Company counts for volumes reaching the level seen before the pandemic outbreak.

Still an increased demand for expanded services offered by Alteris materialized as induced by the COVID-19. The Group has launched testing for SARS-CoV-2 and Voxel acquired a 50% stake in a swab manufacturer Albireo Biomedical. We believe these moves may more than offset a deterioration of the current business results and expect good 2H20 financial results.

2Q20 financial results overview

The Company released its 2Q20 financial results on August 21, after the market close. Adjusted for one-offs 2Q20 net loss reached PLN 3.3 million vs our forecast of PLN 3.6 million and 2Q19 NI at PLN 5.5 million. A yoy deterioration was brought about by a declining number of diagnostic tests performed by Voxel and Scanix coupled with Vito-Med hospital ward closure from February to the end of July. In line with our expectations Alteris improved its financial performance over 2Q.

Guide to adjusted profits

Results adjusted for (i) a gain on a purchase of Scanix, (ii) real estate disposal, and (iii) compensation.

Upcoming events

1. Release of 3Q20 financial results: November 23, 2020

Since Jan. 1 the Group has been consolidating 2 newly acquired entities: Rezonans Powiśle (RP) and Scanix, which also carry out diagnostic tests reimbursed by NFZ; RP signed 2 contracts with NFZ with regard to MRI scans, Scanix signed 4 NFZ contracts for CT and MRI tests. At the beginning of 3Q20 the Group was equipped with 24/19/7 MRI/CT/PET-CT scanners, 4 SPECT scan machines and 1 Ultrasound Fusion—Guided Biopsy machine.

In January/February/March/April/May/June/July the parent company carried out 20,200 (+27% yoy)/20,300 (+34% yoy)/14,200 (-21% yoy)/8,500 (-57% yoy)/ 12,100 tests (-38% yoy)/16, 200 tests (-14% yoy)/18,000 tests (-13% yoy). The test volume reached 36,800 in 2Q vs 37,000 expected and 54,600 in 1Q20. The parent company's 2Q20 revenues stand at PLN 24.4 million (-27% yoy) vs our forecast at PLN 24 million. According to the Company's estimations, in 2Q20 it lost at least PLN 11 million on the revenues level due to the pandemic (PLN 14 million in 1H20).

2Q20 revenues of Scanix/RP/Exira/Vito-Med reached PLN 4 million/PLN 1 million/PLN 1 million/PLN 1 million/PLN 4 million, almost in line with our expectations (PLN 2 million/PLN 1 million/PLN 1 million/PLN 4 million). In 2Q20 Exira stopped for 3 weeks due to renovations which

resulted in a 21%/63% yoy drop in the number of carried out medical procedures/MRI scans. The hospital ward in Vito-Med was renovated as well albeit since June 1 the diagnostic facility for SARS-CoV-2 testing has started operating which added PLN 1.4 million to revenues in 2Q20.

Alteris's 2Q/1H20 revenues stood at PLN 21 million (+167% yoy) vs PLN 14 million expected by us/PLN 29 million (+41% yoy); this stemmed from the projects related to diagnostic equipment supplies.

All in all, the Group's 2Q20 revenues reached PLN 53 million and exceeded our expectations at PLN 38 million. Given quite high fixed costs profitability deteriorated yoy; adj EBIT and net loss arrived at PLN -2.9 million and PLN -3.3 million, respectively vs our expectations of PLN -3.5 million and PLN -3.6 million. The Group booked a PLN 2 million/ PLN 0.1 million gain on the occasional purchase of Scanix/ fixed assets disposal.

It looks like the realization of our forecasts after 1H20 is sluggish. The sales in July picked up, though they were still lower by 11% than in February and 13% lower yoy. The number of diagnostic tests in 2H20 remains under a big question mark though it will undoubtedly depend on the pandemic evolvement and possible restrictions.

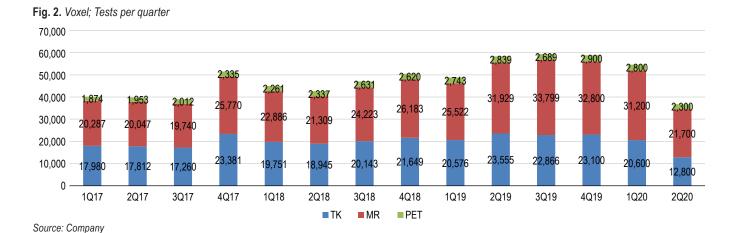

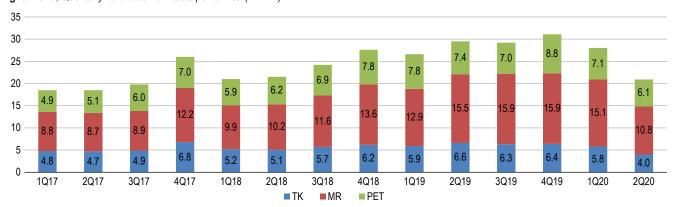

Fig. 3. Voxel; Quarterly revenues from tests performed (PLN m)

Source: Company

The Group has started to offer SARS-CoV-2 diagnostic tests and entered the manufacturing of swabs acquiring a stake in Albireo Biomedical. These two moves should be of a considerable support for the Group's 2H20 financial results.

FY20 financial performance outlook

SARS-CoV-2 diagnostic tests. Voxel informed that in June/July/August (till Aug. 21) its subsidiary Vito-Med performed 5,089/14,814/18,000 COVID-19 RT-PCR tests and generated PLN 5.41 million revenues in June and July which implies an average test price at PLN 272.

With SARS-CoV-2 diagnostic tests to be performed by Vito-Med in August and September assumed at 21,300 and 36,000, respectively, we expect additional revenues in 3Q at PLN 20 million which implies PLN 10 million of additional EBIT provided EBIT profitability stands at 50%. Assuming the volume of SARS-CoV-2 diagnostic tests at 108,000 and 50% EBIT profitability, additional revenues/

EBIT in 4Q20 should reach PLN 29 million/PLN 15 million.

Vito-Med informed it was able to carry out 1,500 tests daily which given the full capacity utilization may generate PLN 12 million revenues monthly. We consider this profitability as high given the Group doesn't employ subcontractors and is able to achieve synergies within its internal structure. It is likely that our assumptions prove conservative.

In our financial model we assume the number of diagnostic tests performed by Vito-Med from January to June in 2021 at 30,000 and at 18,000 in the remaining months. This implies PLN 82 million/PLN 41 million of additional revenues/EBIT in FY21. We do not assume any revenues of this origin in FY22 which means returning to normalized profits.

Nevertheless it should be remembered that the number of diagnostic facilities performing SARS-CoV-2 diagnostic tests has been growing, so has the

Source: DM BOS SA estimates

competition, and NFZ may cut the test price. On the other hand, the Company may expand testing capacities. These activities mitigate deterioration of the core business performance and have a positive impact on profits.

Swabs. We assume the revenues generated by manufacturing of swabs in Albireo Biomedical will arrive at PLN 0.5 million/PLN 1.5 million in 4Q20/FY21.

Voxel, RP, Scanix. We consider the currently lowered demand for CT and MRI scans as deferred, not lost. The limits for CT and MRI scans this year are based on the number of the scans performed in 2019 (high level) and the Company obtains advance payments form NFZ which secures its liquidity. MRI scanners are launched in Bośnia and Sochaczew, PET-CT scan machine is set to start in Warsaw in 3Q20 and in 4Q20 a new MRI scanner will be launched in Tarnów and Zabrze.

Exira. Given Exira's specificity the pandemic has a limited impact on its performance. Besides, funding of PET scans in hospitals changed which should help increase in the number of tests in the coming years. Exira's efficiency has expanded after the replacement of a source of radiation (in July Exira performed 60 Gamma knife surgeries vs 93 in 2Q20).

Vito-Med. Vito-Med's hospital operations have been restructured to focus on the treatment of

neurodegeneration diseases (Parkinson disease) as these are higher paid. We also expect gains on SARS-CoV-2 diagnostic tests. It is likely that part of these revenues will be booked by Alteris, but will undergo consolidation adjustments.

Alteris. The company experiences a high demand which is partly the pandemic induced.

The Group. We forecast the Group's FY20 revenues/ adj EBIT/adj NI at PLN 264 million/PLN 30 million/PLN 20 million (forecast upgrade by 8%/13%/13%) and expect the financial performance improvement in FY21. Provided the pandemic is shut off next year, we expect FY22 results to deteriorate yoy. We would like to stress that our estimates are encumbered with high risk (both ways).

8

Risk factors

- 1. Declining public spending on healthcare (high exposure to NFZ)
- 2. Lowering funding limits for MRI and CT treatments
- 3. The decline in medical services pricing, in particular, CT, MRI, PET-CT treatments
- 4. Change in the State's policy regarding private medical contractors (e.g. renting hospital premises the majority of the Company's services locations)
- 5. Changes in the Company's contracts with NFZ (the majority secured to 2023/2024)
- 6. Changes in legislation regarding the funding of hospitals/treatments
- 7. The decline in the society's affluence (FFS and commercial clients contribute up to 20% of Voxel's revenues)
- 8. New innovative methods of cancer diagnostics/treatment
- 9. Medical errors reputational risk
- 10. Worse quality of diagnostic testing descriptions
- 11. Low and deteriorating availability of radiologists
- 12. Loss/low labor supply
- 13. Salary pressure (in particular of medical and IT staff)
- 14. Oversized investments
- 15. Lagging behind the technological progress in diagnostics

Catalysts

- 1. Aging society
- 2. The number of diagnostic imaging treatments below the standards in developed countries
- 3. High NHS funding limits for MRI and CT treatments, NHS shortening of time limit for payments
- 4. Change of PET funding in hospital treatments
- 5. Medical services pricing increase
- 6. Possible change in regulations with respect to indications for PET treatments (compliant with standards in developed countries)
- 7. Development of the market of private medical services
- 8. Improvement of the treatment mix (towards more advanced)
- New medical services (such as micro-invasive treatments, fusion biopsy, radiofrequency liver ablation, TI, BI, BMN)
- 10. Development of a profitable segment of pharmaceutical research (clinical trials)
- 11. Organic growth, new centres (high barriers to entry)
- 12. Acquisitions economies of scale
- 13. Cooperation with Warsaw University; new radio tracers
- 14. Consolidation of the sector; potential acquisition target
- 15. Al development and new algorithms for test descriptions
- 16. IT software development for cloud diagnostics
- 17. New business lines (COVID-19 tests, swabs)

BASIC DEFINITIONS

A/R turnover (in days) = 365/(sales/average A/R))

Inventory turnover (in days) = 365/(COGS/average inventory))

A/P turnover (in days) = 365/(COGS/average A/P))

Current ratio = ((current assets - ST deferred assets)/current liabilities)

Quick ratio = ((current assets - ST deferred assets - inventory)/current liabilities)

Interest coverage = (pre-tax profit before extraordinary items + interest payable/interest payable)

Gross margin = gross profit on sales/sales

EBITDA margin = EBITDA/sales **EBIT** margin = EBIT/sales

Pre-tax margin = pre-tax profit/sales

Net margin = net profit/sales

ROE = net profit/average equity

ROA = (net income + interest payable)/average assets

EV = market capitalization + interest bearing debt - cash and equivalents

EPS = net profit/ no. of shares outstanding

CE = net profit + depreciation

Dividend yield (gross) = pre-tax DPS/stock market price

Cash sales = accrual sales corrected for the change in A/R

Cash operating expenses = accrual operating expenses corrected for the changes in inventories and A/P, depreciation, cash taxes and changes in the deferred taxes

DM BOS S.A. generally values the covered non bank companies via two methods: comparative method and DCF method (discounted cash flows). The advantage of the former is the fact that it incorporates the current market assessment of the value of the company's peers. The weakness of the comparative method is the risk that the valuation benchmark may be mispriced. The advantage of the DCF method is its independence from the current market valuation of the comparable companies. The weakness of this method is this high sensitivity to undertaken assumptions, especially those related to the residual value calculation. Please note that we also resort to other valuation techniques (e.g. NAV-, DDM- or SOTP-based), should it prove appropriate in a given case.

Banks

Net Interest Margin (NIM) = net interest income/average assets

Non interest income = fees&commissions + result on financial operations (trading gains) + FX gains Interest Spread = (interest income/average interest earning assets)/ (interest cost/average interest bearing liabilities)

Cost/Income = (general costs + depreciation)/ (profit on banking activity + other net operating income)

ROE = net profit/average equity

ROA = net income/average assets

Non performing loans (NPL) = loans in 'basket 3' category

Net provision charge = provisions created - provisions released

NPL coverrage ratio = loan loss provisions/NPL

DM BOŚ S.A. generally values the covered banks via two methods: comparative method and fundamental target fair P/E and target fair P/BV multiples method. The advantage of the former is the fact that it incorporates the current market assessment of the value of the company's peers. The weakness of the comparative method is the risk that the valuation benchmark may be mispriced. The advantage of the fundamental target fair P/E and target fair P/BV multiples method is its independence of the current market valuation of the comparable companies. The weakness of this method is its high sensitivity to undertaken assumptions, especially those

related to the residual value calculation. Assumptions used in valuation can change, influencing thereby the level of the valuation. Among the most important assumptions are: GDP growth, forecasted level of inflation, changes in interest rates and currency prices, employment level and change in wages, demand on the analysed company products, raw material prices, competition, standing of the main customers and suppliers, legislation changes, etc. Changes in the environment of the analysed company are monitored by analysts involved in the preparation of the recommendation, estimated, incorporated in valuation and published in the recommendation whenever needed.

KEY TO INVESTMENT RANKINGS

This is a guide to expected price performance in absolute terms over the next 12 months:

Buy - fundamentally undervalued (upside to 12M EFV in excess of the cost of equity) + catalysts which should close the valuation gap identified;

Hold - either (i) fairly priced, or (ii) fundamentally undervalued/overvalued but lacks catalysts which could close the valuation gap;

Sell - fundamentally overvalued (12M EFV < current share price + 1-year cost of equity) + catalysts which should close the valuation gap identified.

This is a guide to expected relative price performance:

Overweight – expected to perform better than the benchmark (WIG) over the next quarter in relative terms

Neutral – expected to perform in line with the benchmark (WIG) over the next quarter in relative terms

Underweight – expected to perform worse than the benchmark (WIG) over the next quarter in relative terms

The recommendation tracker presents the performance of DM BOŚ S.A.'s recommendations. A recommendation expires on the day it is altered or on the day 12 months after its issuance, whichever comes first.

Relative performance compares the rate of return on a given recommended stock in the period of the recommendation's validity (i.e. from the date of issuance to the date of alteration or – in case of maintained recommendations – from the date of issuance to the current date) in a relation to the rate of return on the benchmark in this time period. The WIG index constitutes the benchmark. For recommendations that expire by an alteration or are maintained, the ending values used to calculate their absolute and relative performance are: the stock closing price on the day the recommendation expires/ is maintained and the closing value of the benchmark on that date. For recommendations that expire via a passage of time, the ending values used to calculate their absolute and relative performance are: the average of the stock closing prices for the day the recommendation elapses and four directly preceding sessions and the average of the benchmark's closing values for the day the recommendation expires and four directly preceding sessions.

This report has been prepared by Dom Maklerski Banku Ochrony Środowiska SA registered in Warsaw (hereinafter referred to as DM BOŚ SA) and commissioned by the Warsaw Stock Exchange SA (hereinafter referred to as WSE SA) pursuant to the agreement on the research report preparation between DM BOŚ SA and WSE SA within the framework of the Analytical Coverage Support Pilot Program described on the WSE SA website: https://www.gpw.pl/gpwpa (hereinafter referred to as the Agreement). DM BOŚ SA will receive a remuneration for the research report in accordance with the Agreement.

The production of the report was completed on August 24, 2020 at 7.00 a.m. The report was distributed on August 24, 2020 at 7.10 a.m.

The report is an investment research within the meaning of Commission Delegated Regulation (EU) 2017/565 of 25 April 2016 supplementing Directive 2014/65/EU of the European Parliament and of the Council as regards organizational requirements and operating conditions for investment firms and defined terms for the purposes of that Directive. This report constitutes a recommendation within the meaning of Commission Delegated Regulation (EU) 2016/958 of 9 March 2016 supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest. This report is for information purposes only.

This report constitutes neither investment advice nor provides investment service as referred to in Article 76 of the Act on Financial Instruments Trading as of 29 July 2005 (Journal of Laws, 2018, Item 2286 as amended), hereinafter referred to as the Act on Trading; it does not constitute any legal or tax advice, neither does it constitute an indication whether an investment is suitable or appropriate in an individual situation of an investor. In particular this report is not a personal recommendation based on any individual needs or situation of any investor. DM BOŚ SA informs that the investment advice services exclusively consist in the preparation of a personal recommendation based on individual needs and situation of a given client and transferring it to them. To receive this type of a recommendation an agreement on providing investment advice services must be signed with an investments company offering these services.

Neither the information nor the opinions expressed in the report constitute a solicitation or an offer to buy or sell any securities referred herein. The opinions expressed in the report reflect independent, current judgment of DM BOŚ.

This report was prepared with due diligence and scrutiny. The information used in the report is based on all public sources such as press and branch publications, company's financial statements, current and periodic reports, as well as meetings and telephone conversations with company's representatives prior to the date of report's release. We believe the above mentioned sources of information to be reliable, however we do not guarantee their accuracy and completeness. All estimates and opinions included herein represent our judgment as of the date of the issue. All opinions, forecasts, calculations and estimates herein constitute the author's subjective assessment as of the date of the issue and can be modified at any time without prior notice. DM BOŚ SA informs that this report will be updated in the manner as referred to in the Agreement, at least once a year.

DM BOŚ SA is an investment firm within the meaning of the Act on Financial Instruments Trading. The legal entity supervising DM BOŚ SA is Polish Financial Supervision Authority in Warsaw (Komisja Nadzoru Finansowego, KNF in Polish abbreviation).

DM BOŚ SA, its management and supervisory bodies and employees do not take any responsibility for decisions taken on the basis of this report and opinions stated herein. Investors bear all responsibility for investment decisions taken on the basis of the contents of this report. The report is intended solely for private use of investors.

Copyrights to this report belong to the WSE. The rules for use of this report have been specified in the Agreement. This report mustn't be redistributed, reproduced or conveyed in any manner or form conflicting with the rules defined in the Agreement.

This report is made available on the day of its issue in the public domain on the website https://bossa.pl/analizy-i-informacje/wsparcie-pokrycia-analitycznego-gpw#voxel

DM BOŚ SA is entitled to conveying or translation of the report into foreign languages on behalf of their clients and this shall not be sooner than making the report available on its website https://bossa.pl/analizy-i-informacje/wsparcie-pokrycia-analitycznego-gpw#voxel.

DM BOŚ SA follows internal regulations for handling of conflicts of interest which include in particular internal organizational and administration arrangements as well as information barriers established for prevention and avoidance of conflicts of interest related to recommendations. A special organizational arrangement that constitutes an information barrier is so called Chinese walls prohibiting an uncontrolled flow of information among particular organizational units or employees of DM BOŚ SA. Where justified, DM BOŚ SA can create Chinese walls upon the realization of a particular project. Potential conflicts of interests referring to a specific recommendation which is made available to the public or to a wide range of persons are disclosed either in the recommendation or in the document attached.

The person(s) preparing this report receive(s) variable compensation indirectly based upon the financial results of DM BOŚ which in turn depend – among other factors – on the result on the brokerage activity.

DM BOS SA has not held any long or short position net exceeding 0.5% of the issuer's basic capital in total with respect to the company/companies indicated.

Apart from the mentioned above cases, there are neither ties of any kind between DM BOŚ SA, the analyst/ analysts involved in the preparation of the report and the issuer(s) of securities as referred to in the report nor circumstances that can justifiably be expected to have a negative impact on objectivity of the recommendation with regard to interests or conflicts of interests on their part or on the part of any natural person or legal entity which pertains to the financial instrument or the issuer.

The report was not shown to the analyzed company before the distribution of the report.
