Objectives:

Investment objective:

The investment objective of the Fund is to achieve the net total return performance of the MSCI Europe Select Catholic Principles Selection 10-40 Index (the "**Index**"), less fees, expenses and transaction costs.

The Index:

The Index is a free float-adjusted market capitalisation index designed to represent the performance of companies with high environmental, social and governance ("ESG") ratings relative to sector peers. The Index is comprised of securities in the form of equities and is constructed from the MSCI Europe Index (the "**Parent Index**"). The Index aims to target sector weights that reflect the relative sector weights of the Parent Index to limit the systematic risk introduced by the ESG selection process. The Index excludes, as per the standard MSCI SRI methodology, companies showing involvement (as defined by the index provider) in the following activities: controversial weapons, civilian firearms, nuclear weapons, tobacco, alcohol, gambling, genetically modified organisms, nuclear power, extraction of unconventional oil and gas, fossil fuel reserves and thermal coal. The Index also excludes companies that are considered not to be in accordance with Catholic Principles as evaluated based on their involvement in the following activities: stem cells, adult entertainment, conventional weapons, abortion, contraceptives, animal testing and failing to comply with the United Nations guiding principles for business and human rights. The remaining securities in the Index are weighted in proportion to their free float-adjusted market capitalisation. The MSCI 10/40 Indexes methodology is applied to securities which qualify for inclusion in the Index such that the weight of any single group entity is capped at 10% and the sum of all group entities with a weight of more than 5% is capped at a maximum of 40%. The Index is rebalanced on a quarterly basis.

Investors should note that the Index is the intellectual property of the index provider. The Fund is not sponsored or endorsed by the index provider and a full disclaimer can be found in the Fund's prospectus.

Investment approach:

The Fund is a passively managed Exchange-Traded Fund.

To achieve the investment objective the Fund will, as far as possible and practicable, hold all the shares in the Index in their respective weightings.

The Fund is an Article 8 Fund (it promotes environmental and/or social characteristics) for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ("SFDR").

The Fund's base currency is EUR.

The Fund may engage in securities lending, whereby 90% of the revenues arising from securities lending will be returned to the Fund and 10% of the revenues will be retained by the securities lending agent.

The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.

The Fund may use derivative instruments for the purposes of managing risk, reducing costs or generating additional capital or income.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the ability for you to receive a positive return on your investment.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency from your local currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown here.

This product does not include any protection from future market performance so you could lose some or all of your investment.

For other risks materially relevant to this product which are not taken into account in the summary risk indicator, please refer to the prospectus and/or the Fund's supplement.
