What is this product?

Type: Shares of a Sub-Fund of MULTI UNITS LUXEMBOURG, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: This Sub-Fund is passively managed.

The objective of this Sub-Fund is to track the performance of MSCI ACWI IMI Disruptive Technology Filtered Index (the "Index") and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index. The anticipated level of the tracking error, under normal market conditions is indicated in the prospectus of the Sub-Fund.

The Index is a Net Total Return Index: dividends net of tax paid by the index constituents are included in the Index return.

The Index aims to represent the performance of companies aligned to themes commonly associated with or described as disruptive technology and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe as further described in Appendix I – ESG Related Disclosures to the Sub-Fund's Prospectus.

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating the Index, integrating an environmental, social and governance ("ESG") rating. The Index methodology is constructed using a "Best-in-class approach": best ranked companies are selected to construct the Index. "Best-in-class" is an approach where leading or best-performing investments are selected within a universe, industry sector or class. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers). The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The limits of the approach adopted are described in the Sub-Fund's prospectus through risk factors such as Risk linked to ESG Methodologies. The limits of the approach adopted are described in the Sub-Fund's prospectus through risk factors such as Sustainable investment risk. The ESG score of companies is calculated by an ESG rating agency, using raw data, models and estimates collected/calculated using methods specific to each provider. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete.

Assessment of sustainability risks is complex and may be based on ESG data which is difficult to obtain, incomplete, estimated, out of date and/or otherwise materially inaccurate. Even when identified, there can be no guarantee that these data will be correctly assessed.

More information about the composition of the Index and its operating rules are available in the prospectus and at: www.msci.com. The Index value is available via Bloomberg (MXACDSRT).

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds with the ability to bear losses up to the amount invested.

Redemption and Dealing: The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges. Only authorised participants (e.g., selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the MULTI UNITS LUXEMBOURG prospectus.

Distribution policy: As this is a non-distributing share class, investment income is reinvested. the accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the MULTI UNITS LUXEMBOURG prospectus.

What happens if Amundi Luxembourg S.A. is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of MULTI UNITS LUXEMBOURG. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the Management Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.
